Cell: B5

Comment: Set to True unless trading Long EURUSD

Cell: B6

Comment: Fixed Lot size you wish to trade if Money Management is off (Scalper_UseMM = False)

Cell: B7

Comment: Auto Adjusts Lot Size based on LRR. Ignores Scalper Lot setting if set to True.

Cell: B8

Comment: Percent of free margin used to open a new trade. Determines lot size based on available margin and the % value set here. I.e. If Scalper_LotRiskReductor=5, then it will risk 5% of your available margin. Scalper_UseMM must be set to True.

Check the forum: <http://fapturbo.com/forum/viewtopic.php?f=10&t=3822&p=24346>

Cell: B9

Comment: Maximum Lot Size

Cell: B10

Comment: Base your GMT Offset on your Broker's Market Watch Time, NOT your Server Time or Local Computer Time. In Hours

Cell: B21

Comment: Hides SL and TP values, what your Broker sees is what's displayed on your MT4 Platform

Cell: B22

Comment: Set \$ Profit Limit amount will stop trading after it reaches it's limit for the day. 0 = ignore this value

Cell: B23

Comment: Sets \$ Loss Limit per day, if met, closes all trades. 0 = ignore this value

Cell: B24

Comment: Turns on/off the custom level filters

Cell: B25

Comment: Number of hours you wish not to trade after hitting SL (Stop Loss)

Cell: B26

Comment: Measures volatility in the completed bars. Measures completed bars for the last 45 minutes.

Cell: B27

Comment: Turns on/off trend filter based on the Moving Average Calculation

Cell: B28

Comment: If TRUE, EA will trade on Fridays

Cell: B29

Comment: 1 = YES, 1 trade per session per currency pair

Cell: B30

Comment: If set to false, it will ignore the Scalper_OneTrade Value

Cell: B31

Comment: Turns on/off Trend Filter based on the Moving Average Calculation.

Cell: B32

Comment: Period of Filtering MA

Cell: B33

Comment: The way of calculating MA

- 0 = Price_Close
- 1 = Price_Open
- 2 = Price_High
- 3 = Price_Low
- 4 = Price_Median
- 5 = Price_Typical
- 6 = Price_Weighted

Cell: B34

Comment: The Type of MA

- 0 = Simple
- 1 = Exponential
- 2 = Smoothed
- 3 = Weighted

Cell: B35

Comment: Adjust the amount of spread you are willing to pay your broker. The higher the number the more risk.

For EURCHF, GBPCHF, USDCAD, maxspread can go up to 6-10

Cell: B36

Comment: Maximum pip movement when attempting to exit out to prevent off quotes.

Cell: B37

Comment: Optional - Replace with anything you want. These comments appear on each trade.

Cell: B38

Comment: Must be Unique for each EA, otherwise the EA's will get confused as to which trades they control.

Cell: B39

Comment: Requires LARGE capital. Trade with 0.1 lot for capital 10K or above. Do NOT use with small deposits.

Make sure UseScalperStrategy is set to FALSE

Cell: B40

Comment: If set to 0, the EA will ignore this lot size value and use MM.

Cell: B41

Comment: Percent of free margin used to open a trade. Only used if FapTurbo_Lots = 0. Check the forum: <http://fapturbo.com/forum/viewtopic.php?f=10&t=3822&p=24346>

Cell: B42

Comment: Maximum Number of open trades at the same time.

Cell: B43

Comment: FapTurbo_Lots=0, i.e. MM = True, This value is ignored and lot size is determined based on the MM calculated value.

Cell: B44

Comment: Number of minutes not to open another trade until x minutes have past

Cell: B45

Comment: Symmetrical Alligator
Parameter for DeMarker Indicator
See Link at Metatrader site

Cell: B46

Comment: Symmetrical Alligator
Parameter for WPR Indicator
See Link at Metatrader site

Cell: B47

Comment: Value of Pips for TP

Cell: B48

Comment: Number of pips for SL
If = 0, no SL is set

Cell: B49

Comment: Trailing Stop Value

Cell: B50

Comment: Number of hours to stay in a trade, 0=not active

Cell: B51

Comment: 1st day of each month, all trades are closed. Value determines number of months. 0 = value is ignored.

Cell: B52

Comment: Period of Slow Moving Average (Daily). Analyse last x number candles (ie. 100).

Cell: B53

Comment: Period of Fast Moving Average (Daily). Analyse last x number candles (ie. 100).

Cell: B54

Comment: Price Moving average symmetrical allegator, 0 = Price Close
1 = Price Open
2 = Price High
3 = Price Low
4 = Price Median
5 = Price Typical
6 = Price Weighted

Cell: B55

Comment: Type Moving average symmetrical allegator,
0 = Simple
1 = Exponential
2 = Smoothed
3 = Weighted

Cell: B56

Comment: MA Shift in Daily Bars for Slow MA.

Cell: B57

Comment: MA Shift in Daily Bars for Fast MA

Cell: B58

Comment: The Number of daily bars to count back from the current bar to calculate possible MA Cross. Used if FapTurbo_CriticalDays > 0

Cell: B59

Comment: The number of critical days after the expected cross of MAs. If 0 then FapTurbo_LookForDays value is ignored.

Avoid when crosses happen usually in 45 days

If we expect MA Cross then FapTurbo will miss dangerous trading day.

Cell: B60

Comment: Number of days the EA will NOT trade after the possible MA cross. If = 0, then value is ignored.

Cell: B61

Comment: Monitors Hedging, 0 = no effect.

Opens every new added trade with a decreased lot size.

Looks for second trade and splits lot size in half if value = 1 and FapTurbo_MaxOrders is at least 2.

Cell: B62

Comment: Turns on/off Hedging feature. 1 = On / 0 = Off.

If set to 1, then fapturbo will not open a second position in the same direction.

Cell: B63

Comment: NFP (None Foreign Payroll) = 1st Friday of every month by the US body of labor, paid # of workers, bad time to trade due to volatility

0 = NFP days are avoided

Cell: B64

Comment: 1 = Will Trade on Fridays
0 = No Trading on Friday

Cell: B65

Comment: If 1, fapturbo will be careful and miss all risky days when slow and fast MA have different directions

Cell: B66

Comment: 1 = FapTurbo will trade with symmetrical Alligator Indicator on the risky days when slow and fast MA have different directions.

Cell: B67

Comment: If Both MA are up or down, will follow global trends if = 1

Cell: B68

Comment: 1 = closes all open losing trades if their direction is opposite to the MASmall

Cell: B69

Comment: 1 = true, 0 = false

If 1, then uses safe lot size during dangerous days which is defined in the next field (FapTurbo_LowLot)

Cell: B70

Comment: Lot size to use during dangerous periods if FapTurbo_AlwaysTrade is set to = 1

Cell: B71

Comment: Maximum number of daily bars where both Mas have the same direction. If the trend has gone for this period of time, expect a change.

Cell: B72

Comment: Number of days after a FapTurbo_TooGoodToBeTrue event that should be considered as risky days

Cell: B73

Comment: Hour to start the trading interval

If 0 = Trading around the clock

Cell: B74

Comment: Minute to start the trading interval

If 0 = Trading around the clock

Cell: B75

Comment: Hour to stop the trading interval

If 0 = Trading around the clock

Cell: B76

Comment: Minute to stop the trading interval

If 0 = Trading around the clock

Cell: B77

Comment: 1 = Yes

0 = No

If Yes, only one trade will be open during the defined trading interval

Cell: B78

Comment: Alligator indicator parameter

Cell: B79

Comment: Maximum pip movement when attempting to exit out to prevent off quotes.

Cell: B80

Comment: Optional - Replace with anything you want. These comments appear on each trade.

Cell: B81

Comment: Must be Unique for each EA, otherwise the EA's will get confused as to which trades they control.

Cell: B83

Comment: Must be Unique for each EA, otherwise the EA's will get confused as to which trades they control.

Cell: B84

Comment: Some Brokers do not honor Microlots, i.e. FxPro. If Broker does NOT allow microlots, Set to False to allow MM to work.

Cell: B85

Comment: If your MT4 is setup to send email, if set to True, it will email you when it's opened a trade.
